
Primary Persona

Climbing Newbie "Xia Xia" | Entry Explorer

USER PERSONA ANALYSIS • 2026

Xia Xia's 10%: Objective Quantitative Data

Basic Profile

Age:**23 years old**
Occupation:Operations Specialist
Location:Suzhou Industrial Park

Financial Status

Monthly Salary:**¥6k - ¥8k**
Climbing Budget:¥500/month
Equipment:Relies on gym rentals

Time & Location

Availability:Weekends 2-4 PM
Duration:2 hours per session
Prefers:Gyms ≤5km away

Skill Level

Level:**Complete Newbie**
Grade:V0 - V1
Experience:No prior experience

Device

Primary Device:**iPhone 13**
Usage:High frequency daily use
Platform:iOS Ecosystem

Key Constraints

Budget:Limited for equipment
Time:Fixed weekend slots only
Skill:Needs basic guidance

Xia Xia's 80%: Core Goals

Find Partners

Quickly find partners at the same newbie level to avoid social anxiety and awkwardness when climbing alone.

Select Gyms

Accurately screen newbie-friendly climbing gyms, and clarify information such as equipment rental and newbie benefits.

Learn Skills

Participate in newbie-exclusive climbing sessions, preferably with simple guidance from coaches to quickly master basic skills.

Low-Cost Entry

Get started at low cost without purchasing equipment in advance, and obtain reliable newbie equipment guides.

Xia Xia's 80%: Core Pain Points

Difficulty Finding Partners

Most communities are for experienced climbers. She struggles to connect with newbies at the same level.

Disorganized Information

Online info is scattered. Cannot quickly judge gym suitability for newbies; rental prices are opaque.

Social Anxiety

Afraid to go alone without guidance. Worried about being looked down upon when asking questions.

No Direction for Start

Lacks basic guidance, doesn't know where to begin, and fears injury from incorrect movements.

Difficulty Matching Time

Only has fixed time on weekends, making it hard to match with newbies available at the same time.

KEY INSIGHT

These pain points represent the untapped needs of the beginner climbing market.

Addressing these 5 core pain points will be the foundation of our product strategy to capture the beginner segment.

Xia Xia's 10%: Scenario Implementation

Typical Scenario

On Friday night, Xia Xia uses the "Newbie Climbing" section of ClimbLink to quickly match with a newbie partner from the same community and signs up for a nearby newbie-friendly gym. After the activity, she shares a commemorative card.

Extreme Scenario

After arriving at the gym, her partner cancels last minute. She uses the APP's "Gym Real-time Matching" feature and quickly finds another newbie at the gym, successfully pairing up.

Secondary Persona

Advanced Enthusiast "Lao Zhou" |Advanced Challenger

CORE USER SEGMENT ANALYSIS

Lao Zhou's 10%: Objective Quantitative Data

Basic Profile

Age:30
Occupation:Freelance Designer

Financial Status

Monthly Income:>15k RMB
Budget:2k/month (Owns gear)

Time Investment

Frequency:3-4 times/week
Duration:3 hours/session

Climbing Level

Experience:2 years
Grade:Stable V4 / Challenging V5

Device & Location

Device:Huawei Mate 60 Pro
Loc:Gusu District, Suzhou

Mobility

Willing to travel:≤10km
Status:Deep Enthusiast

Insight: Lao Zhou is a financially independent and time-flexible freelancer with extensive climbing experience and personal equipment, positioning him as a high-value, deep enthusiast of the sport.

Lao Zhou's 80%: Core Goals

Find Advanced Partners

Seek partners at the same advanced level to challenge difficult routes together.

Organize Events

Independently initiate advanced climbing sessions and efficiently manage registrations.

Record Achievements

Track climbing footprints, generate a personal achievement map, and gain a sense of accomplishment.

Access Information

Obtain the latest route guides and gym updates.

Professional Coaching

Find professional coaches for 1v1 guidance to break through technical bottlenecks.

Continuous Growth

Leverage data and community to ensure steady improvement in climbing skills.

Lao Zhou's 80%: Core Pain Points

Few Advanced Partners

Existing friend circles have mixed skill levels, hard to find partners for difficult routes.

Outdated Information

Route updates from gyms are scattered and not obtained in a timely manner.

Inefficient Event Organization

Organizing via social media is time-consuming for registration tracking.

Rehabilitation Needs

Has sports injuries but lacks professional climbing rehabilitation guidance.

No Achievement Tracking

Unable to systematically record climbing achievements, lacking a sense of accomplishment.

KEY INSIGHT

These pain points directly impact the experience of advanced climbing enthusiasts.

Lao Zhou's 10%: Scenario Implementation

Typical Scenario

Lao Zhou initiates an advanced event through ClimbLink, quickly recruits partners, records the difficult routes he completed after the event, and shares his achievement map.

Extreme Scenario

Injuring his wrist while climbing, he accesses professional rehabilitation guidance and recommendations for light activities through the APP's "Rehabilitation Section," safely recovering during his rehabilitation period.

Edge Persona

Gym Operator "Wang Guan" | Gym Operator

Wang Guan: Profile & Goals

Personal Background

Wang Guan

Founder | Yanxing Climbing Gym

Age:35 Years Old
Location:Suzhou, China
Positioning:Newbie-friendly climbing experience
Challenge:Insufficient exposure & slow growth

Core Goals

Increase Exposure

Gain more visibility on the platform to attract new users.

Efficient Operations

One-click event publishing, registration statistics, and info management.

Understand Users

View user reviews and profiles to optimize services.

Win-Win Cooperation

Collaborate with platform coaches to enhance gym value.

Wang Guan's Core Pain Points & Scenario Implen

Core Pain Points

- Single exposure channel & inefficient event management
- Untimely information updates to users
- Vague user profiles & limited interaction

Typical Scenario

Through ClimbLink's backend, Wang Guan publishes a "Weekend Newbie Session" in one click, gaining exposure and 15 new registrations. Post-event, he reviews feedback via the backend to refine services.

ClimbLink Gym Management Backend Interface

Data-Driven Operations

Real-time data analytics help optimize event strategies and user engagement.

Design Principle Analysis: The 10-80-10 Golden

10% Quantitative Data

Objective, quantifiable user background, serving as the solid foundation of the persona.

80% Qualitative Characteristics

User goals, pain points, and motivations. The core of the persona that determines feature priority.

10% Scenario Implementation

Translating abstract characteristics into specific usage scenarios to verify design rationality.

"Interlocking parts for a complete user persona"

Summary and Outlook

Research Summary

Based on in-depth analysis of user personas (Xia Xia, Lao Zhou, Wang Guan), we have identified the core functional modules for ClimbLink:

- Partner Matching
- Event Organization
- Gym Services
- Community Interaction

Future Outlook

These user personas will serve as the core basis for our subsequent product requirement analysis, feature design, and interaction optimization. Using this as our blueprint, we will build a community platform that truly understands users and creates value for climbing enthusiasts and operators.
